## Introduction

QUANI Company Ltd. was founded as a reputable organization with its headquarters in Riyadh. We are working to create competitive advantages for ourselves in the field of our specialization in the safety of buildings and facilities and firefighting, implementing them in accordance with international standards, and supervising them by an integrated team of engineers and technical cadres trained to carry out installation and maintenance work for fire alarm and firefighting equipment. The company is committed to ensuring the safety of people and facilities by supplying high-quality materials that represent the most recent technology in the field of fire alarm and firefighting, as well as being in accordance with local and international approved specifications and standards.

## CEO Speech

We at QUANI Company for Safety and Fire Fighting aspire to be leaders in our field of specialization in the safety of people, buildings, and facilities. Our company relies on the experience of its engineering staff and specialized technicians, and it prioritizes customer satisfaction by completing the projects entrusted to it on time, with an emphasis on commitment to international and local specifications and standards, and by using the latest technologies and equipment to keep pace with the needs and requirements of the Saudi market. We always aim to defy difficulties by achieving what we aspire to continue our mission in the best way possible by delivering high quality projects on time with skilled and quality staff, resulting in an improvement in QUANI Company's performance level.

## Our vision

To be the best company in the field of safety in the Kingdom in providing innovative solutions to protect life, environment and property.

## Our message

Many fires break out every year incurring huge losses of lives and property indiscriminately. Our goal is to provide and deliver fire alarms in order to contribute to reducing these damages by providing devices that can locate fires and the source of ignition immediately after its start, as well as ways to extinguish them in order to save lives and property

## Our mission

Providing the best services, as we have attracted a group of engineers and technicians who have long experience in the field of safety, managed and supervised by qualified national cadres

وزارة التجارة والاستثمار  
Ministry of Commerce and Investment

## Quality Policy

GUANI believes that customer satisfaction is the focal point of our operations. So, has established a quality management system which operates all processes required to identify those needs and expectations in order to understand what requirements must be met to be able to provide a quality services that will satisfy customer's needs. We realize that customer needs and expectations continually change in the challenges of business development and ever-changing environment. Therefore, we must work closely with our current and potential customers to understand the trends in order to be able to offer a suitable service ahead of the competition. Those changing circumstances are the challenge that can only be addressed by changing and improving our management system and its processes continually. To this effect we are continually updating objectives within the Organization and Suitable programs are being implemented to facilitate achieving those objectives.

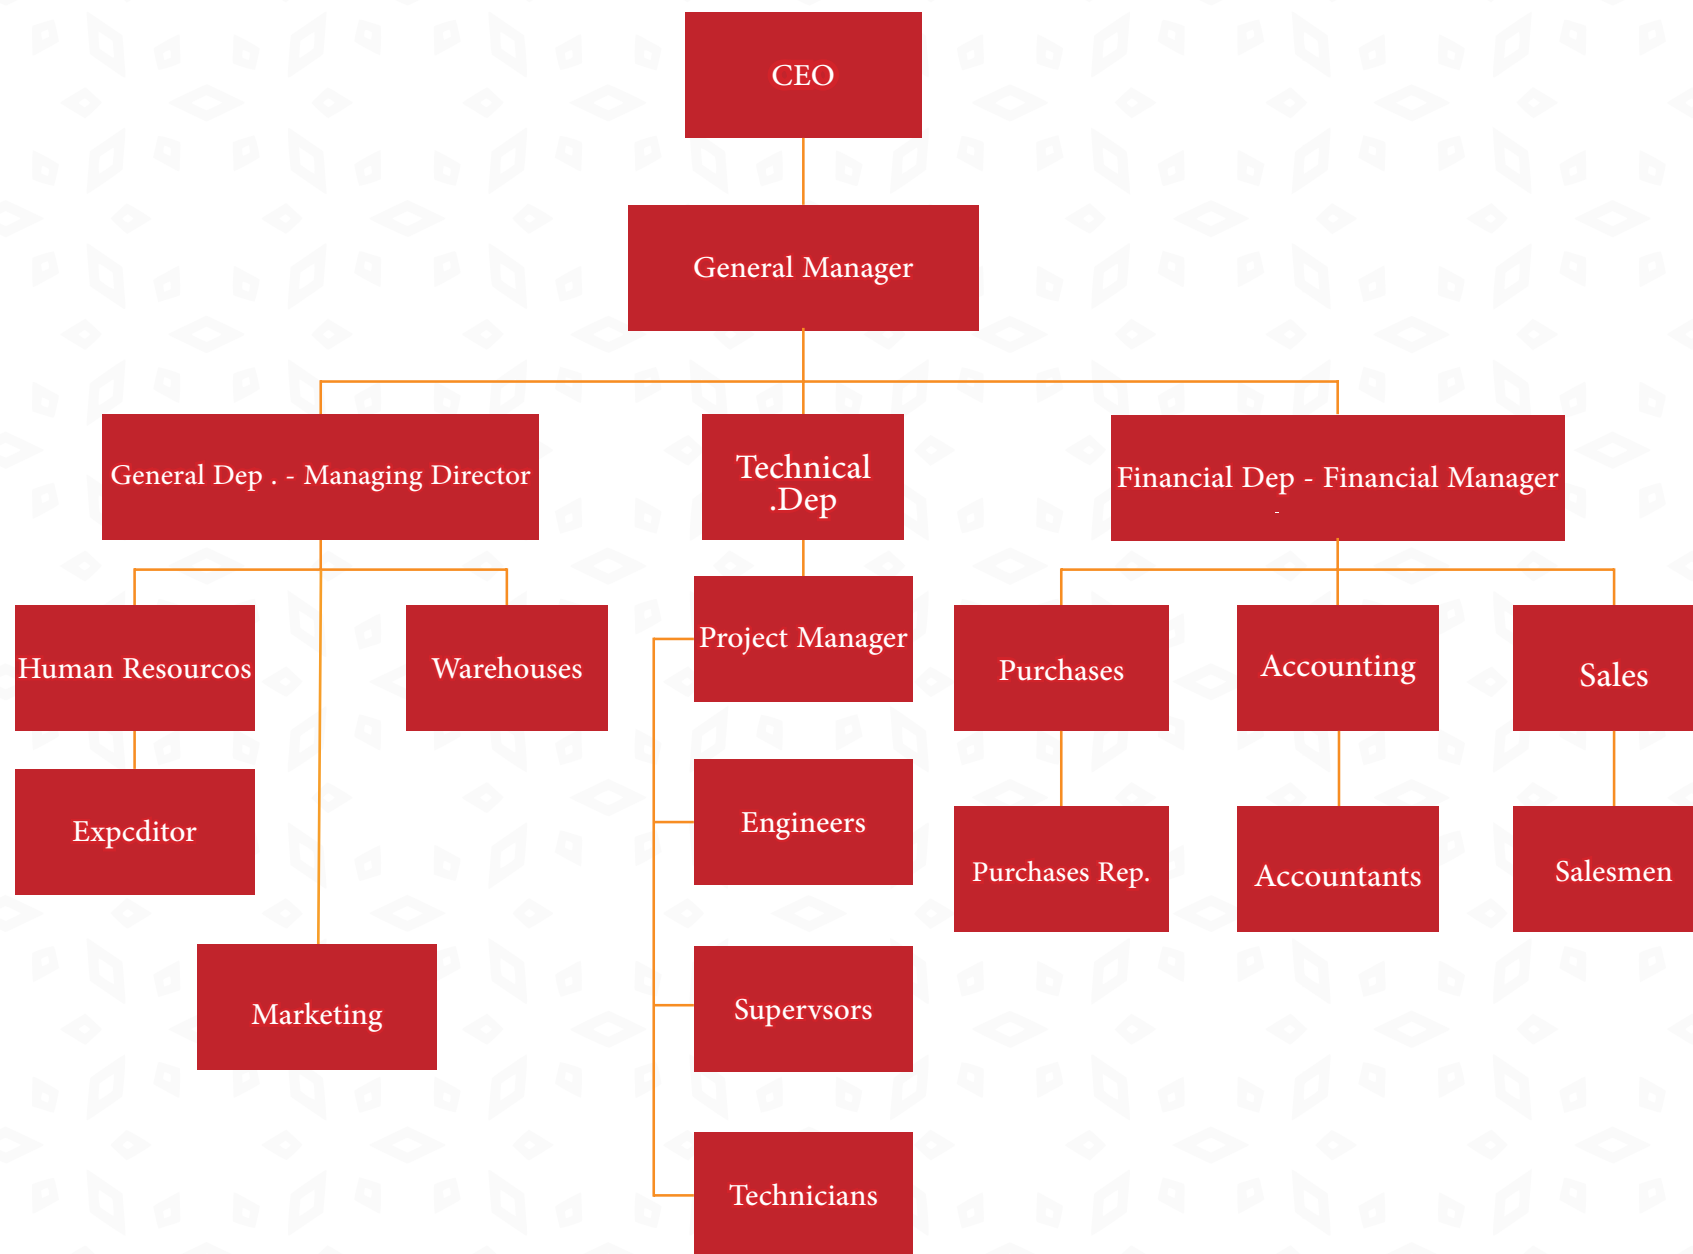

## Environment, Health & Safety (EHS) Policy

GUANI will continually strive towards conserving resources and prevent pollution. We are committed to prevent workplace injuries and promoting healthy living at workplaces. We identify and correct health and safety hazards and ensure to minimal hazards in work environment.

This HSE (Health, Safety & Environment) Policy applies to all GUANI employees regardless of position within the company:

1. To provide adequate control of HAZARDS arising from our work activities.
2. To provide and maintain safe plant and equipment.
3. To ensure safe handling and use of equipment.
4. To provide information, instruction and supervision for employees.
5. To ensure all employee are competent to do their tasks, by providing adequate safety trainings.
6. To prevent accidents and cases of work-related ill health.
7. To consult with our employee on matters affecting their health and safety.
8. To maintain safe and healthy working conditions both within the company premises or at customer's site.
9. To review and revise this policy as necessary at regular intervals.

# ORGANIZATION CHART

## SCOPE OF SERVICES

- **Install all required safety equipment:**  
We install all safety equipment required for shops, warehouses, offices, buildings, hotels, workshops and all facilities
- **Issuance and renewal of municipal and civil defense license:**  
We issue and renew municipal and civil defense licenses, install gas leak detectors and gas arrestors, complete the electronic safety service site and conduct the requirements of the fire alarm and firefighting.

- **Design and approval of safety plans safety plans for the Civil Defense:**

We select and follow up the design and approval of safety plans in the engineering offices approved by the Civil Defense, according to the requirements of the fire alarm and firefighting approved by the Civil Defense for speed of implementation.

- **Provide all required papers and documents to complete the procedures for the safety site service:**

Because we are one of the safety companies approved by the Civil Defense in Riyadh, we provide all the required papers and documents to complete the procedures for the safety site service:

- Certificate of completion of installation
- Electrical wiring safety certificate
- Certificate of Achievement for Administrative Control

- Providing all maintenance contracts for facilities:

Because we are one of the safety companies approved by the Civil Defense in Riyadh. We provide all maintenance contracts for alarm and firefighting systems for facilities

- fire pumps:

Fire pumps push water to firefighting systems when needed according to each firefighting system, we supply, install and maintain all fire pumps

- **Fire alarm panels:**  
voice evacuation system is designed to issue a notification so that an area crowded with people, such as a work area, for example, is evacuated, in the event of an accident, God forbid, such in order to save lives and not lose them, which is common in many buildings.

- **fire alarms:**  
Fire alarms are the primary consideration to avoid fire losses. Saving lives is all we aim for in the event of fires occurring in the building so that it is quickly left before the spread of the fire. This is the primary function of fire alarm devices

- **Fire extinguisher:**  
The use of a fire extinguisher is important to put out fires in many places. The validity and follow-up dates must be as stipulated in the code and civil defense requirements

- **Security camera installation (CCTV):**  
The use of monitoring systems is very important and one of the requirements of the Ministry of Interior for establishments and stores.
